

EXAMINATION RESULTS

GRS Report Number	GRS2025-010855
Award Number	5545
Date	17 th January 2025
Object Description	One important gemstone
Identification	Natural Ruby
Weight	5.03 ct
Dimensions	9.22 x 8.92 x 6.79 (mm)
Cut	modified brilliant/step (5)
Shape	cushion
Color	pinkish-red (GRS brilliancy-type "vibrant")
Comments	No indication of thermal treatment FTIR-tested
Origin	Mozambique

Appendix

GRS Laboratories examined a 5.03 ct natural ruby, described in report number GRS2025-010855, that demonstrates very good characteristics worthy of a dedicated mention.

This important ruby is distinguished by a rare combination of size, and an excellent pinkish-red color variety, very good brilliance and transparency.

Analytical and advanced testing traces the origin of this gemstone to the mines of Mozambique, the mining area currently producing the largest and most significant rubies. The fascinating internal world of classic Mozambican ruby inclusions can be witnessed in this particular gemstone. At the time of testing, it was concluded that the gemstone was spared from thermal enhancement.

The combination of very good attributes that this ruby displays was concluded to be important. The pinkish-red color radiates harmoniously in tone and brilliance qualifying for the GRS-type **◆vibrant◆** designation. **◆Vibrant◆** is an attribute given to gemstones that display a high amount of color reflection **◆** as opposed to the separately considered category of color saturation. A **◆vibrant◆** appearance is achieved through the skillful cutting of a gemstone to its optimal proportions, resulting in greater-than-usual weight loss and a maximized reflection pattern.

Untreated rubies of such size and high quality are rare.

Dr. A. Peretti
